

PROTEK

Decking Stain

Protek Decking Stain has been specially formulated to give all types of external timber decking an enriching colour that is hardwearing and lasts.

Once dried Protek Decking Stain leaves behind a hard durable surface that can withstand foot traffic. It is a water based acrylic and alkyd hybrid that incorporates a polyurethane dispersion based on linseed oil, a natural renewable resource.

This waterproofing stain can also be used to colour and protect hardwood and softwood garden furniture and even your summerhouses and garden sheds.

It is recommended that 2 coats are applied. Apply the second coat between 2 and 4 hours after the first. Extra coats will further enhance the colour and hard wearing layer. With further coats a sheen may appear.

COVERAGE: APPROX. 8M² PER LITRE

On average a 2.5 litre container will cover approximately 20m² depending on the moisture content and porosity of the timber.

✓ Decking

✓ Balustrades

✓ Garden Furniture

Benefits:

- Hard Wearing Protective Coating
- Easy Water Clean Up
- Low Odour and Low in VOC
- Water Repellent
- Harmless to Pets & Plants once dry
- Peel & Crack Resistant
- Great Coverage
