

ENVIRONMENT & MANUFACTURING PROCESS

Eco-Fencing is manufactured from 92% recycled material

In using Eco-Fencing you can be assured that you are protecting the world's natural resources and helping to preserve the planet for future generations. PVC-u has been evolved since the 1940's and has become universally used, cost effective, adaptable, safe and an environmentally efficient material.

1. PVC-U waste waiting to be processed.

2. Waste is sourced from around the UK.

3. Waste entering the processing plant.

4. After being broken down and graded, it then moves onto the next phase.

5. Once the waste has been washed and all impurities removed, it is then processed to the pellet form.

6. Recycled waste ready to be turned into Eco-Fencing
